GitHub: https://github.com/SiddeGnaneswarReddy **Mobile**: +919705017494

SKILLS

- **Languages**: Java, Python, C, SQL, HTML, CSS
- **Frameworks**: Excel, Tableau, NumPy, Pandas, Matplotlib, Seaborn
- **Tools/Platforms**: Excel, Git, Tableau, Jupyter Notebook
- **Soft Skills**: Leadership, Collaborative, Problem solving, Adaptability

INTERNSHIP

Android Development | Java, Rest APIS, Retrofit, RHEL Jun 25 –Jul 25
Software Development (Android) | Link

- Enhanced Android application utilizing Java optimizing system to reduce crash rates by 70% and improve overall stability.
- Leveraged **android studio** with fast- paced environment to engineer, debug and deploy scalable Java- based environments.
- Gained strong exposure to **system-level operations** and **troubleshooting** in enterprise environments.
- Streamlined android application functionalities using Java, focusing on **performance optimization** and **scalable design**.

PROJECTS

Customer Sentiment and Ticket Analytics Dashboard | GitHub Jul 25

- Transformed a raw unstructured dataset of 8000+ plus complaints into a structured, queryable data using **advanced NLP**.
- Embedded serverless **LLM inference** to automatically score customer sentiment (Positive/Negative/Neutral) and generate a 10- Word actionable summaries for each ticket.
- Devloped and deployed a dynamic Data Dashboard using **Stream lit** and **Plotly** enabling stakeholders to instantly visualize issue distribution and filter critical hardware/bugs.
- Implemented secure **REST API** Connections **to Groq inference engine**, building in automated error handling, rate-limit pausing, and strict **JSON** -Parsing safety nets.

Object Oriented Java Audio Engine | GitHub Feb 25

- Planned a comprehensive object-oriented music playback engine in Java utilizing **Encapsulation** and **Collections Framework** to securely manage dynamic playlists, track metadata and sequential navigation.
- **Orchestrated** a robust command line-Interface governed by strict state-Management protocols via **Enums**, ensuring flawless transitions between playback states while completely preventing run-time logic errors.
- Designed an **interactive console** execution loop with comprehensive error handling to prevent out – of – bound runtime exceptions.
- **Utilized** the **Java collections** framework to dynamically manage playlist queues and securely store and track metadata.

CERTIFICATES

- **Python for Data Science and Machine Learning** – *Link* *Mar 26*
- **SQL Certificate: Hacker Rank** – *Link* Jan 26
- **Data Structures and Algorithms with Java** – *Link* Jun 24
- **Computer Programming** – *Link* May 24
- **Forage Data Analytic Job Simulation** – *Link* Aug 23

ACHIEVEMENTS

- **Naukri Campus Young Turks | Link** Nov 24
  Achieved **97.5 percentile** in Naukri campus Young Turks attitude competition organized in **Naukri campus**.
- **Leet Code | Link** Nov 24
  Solved 100+ plus problems across various **Data Structures and Algorithms**, Demonstrating Strong Problem-Solving skills.

EDUCATION

- **Lovely Professional University** Kakinada, AP
  B. Tech; ***CGPA: 7.05*** *Aug 23 –Mar 27*
- **Sri Chaitanya Junior College** Vijayawada, AP
  Intermediate; ***Percentage: 95.1*** *Jun 21 –Mar 23*
- **Viswa Barati High School** Gudivada, AP
  Matriculation; ***Percentage: 100*** *Jun 20 – Mar 21*
